

## Waste & Resource Management

Consulting - Regional Waste Management

**Without special know-how of external consultants, various projects are not practicable these days. Enterprises, authorities and organizations involved in different complex projects turn to denkstatt as specialists and authors of studies as well as consultants for different issues concerning waste management. denkstatt is one of the leading consulting enterprises in Austria with many years' experience which works, among other fields, in Waste Eletronical & Electronic Equipment Directive (WEEE), plastic recovery and waste management market analysis.**

### Goals

To solve complex questions in the field of waste management: for authorities, organizations and enterprises.

### Procedure

- Offer a project: plan, timetable, structure and costs
- Investigation (data, information)
- Analysis, calculation, reporting
- Intermediate results - Intermediate reporting and presentation
- Improvement of data and if necessary further investigations, reporting
- Final results, final report and presentation, if requested joint public presentations
- Meetings/Workshops during the project phase

### Benefits

Example WEEE

We supply authorities with our comprehensive analysis studies e.g. in the run-up to implementation of laws and ordinances. Provide detailed statements for the implementation or the application of the foresaid.

Detailed products are delivered to organizations and enterprises according to their requests. These may include manuals for producers/importers, treatment and recovery facilities or waste collection enterprises and the general consulting for the correct application of the Austrian WEEE-Ordinance.

### Example market analysis

Organizations and enterprises can make a better estimation of the markets in the field of waste management through our market analysis for different countries. As a result, our customers have a significant lead over other the competitors when a new market is opened up.

### Why denkstatt

- We are a leading consulting enterprise in Austria in these fields
- We have many years of experience and know-how
- We have national and international contacts to relevant experts in the field of waste management
